Introducing Fund Yielders

Growth chart

Overview

Fund Yields is an automated investment platform that aggregates funds for investment in crypto and other assets. Being an automated system, this means that there's no need for specialist staff such as network technicians because each user activates and runs their own investments independently.

We believe in an open, secured and transparent system where users can leverage on a distributed network. We also believe that everyone should have the freedom to earn, hold, spend, share and give their money - no matter who you are or where you come from.

We're also committed to meeting the highest standards for regulatory compliance to maintain our responsibility to our users and further build a sustainable path forward for the blockchain industry.

Fund Yielders ecosystem

- 01 SECURE AND SAFE -**
The network system is designed to let users personally mine and manage their own nodes without third-party intervention.
- 02 TRANSPARENCY AND TRUST -**
Over the past 15 years working with our experts, we took transparency as one of our core values, you can be rest assured that you can trust us.
- 03 BLOCKCHAIN BASED DISTRIBUTION -**
With our networks distributed across the globe, we guarantee that our user's get the best services they deserve.
- 04 PAYMENT FLEXIBILITY -**
We do not delay in rewarding our users as our payment systems are automated and it's guaranteed to distribute rewards across connected users.

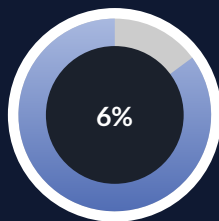

Target Audience

We've resumed offline events and meet-ups in cities where they're permitted, from USA and Canada to Europe. Meet-ups give community members the chance to connect and share ideas in person, hear from Fund Yielders team members, industry experts, and special guests. Our target audience are people that want to have passive income system as a backup plan.
